

Inventory Manager Upgrade

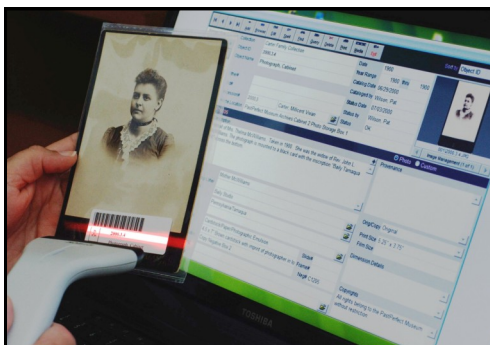

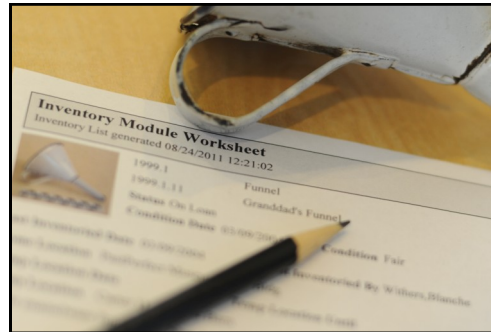

Achieve your goal of an organized collection with PastPerfect's Inventory Manager Upgrade!

Inventories are an essential part of managing collections. With PastPerfect's new Inventory Manager, you now have an easy-to-use and affordable tool to help you accomplish successful collections tracking projects. This add-on product makes it simple to create inventory lists, print barcode labels, track collections electronically, and ensure accurate records.

Generate Inventory Lists

- **Automatically generate targeted lists** based on catalog, status, collection, or last inventoried date. Lists can include or exclude items on loan or exhibit.
- **Build sampling lists** that randomly select a fixed number or percentage of your collection.
- **Print customized inventory worksheets** that enable staff and volunteers to efficiently locate and document collections away from the computer.

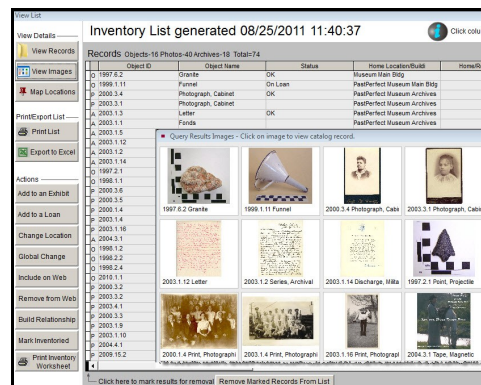

Record Inventoried Items

- **Scan barcodes** or manually create a list of Object IDs with your laptop, tablet or smartphone.
- **Import your inventory list**, then update the items' records using global update features.
- **Produce instant reports** of items "found in collection" that have yet to be cataloged electronically.

Reconcile Your Collection

- **Quickly update inventory information** in PastPerfect with a few mouse clicks.
- **Easily change home or temporary locations** with the Catalog List Manager.
- **Maintain an inventory history** on each catalog record to better track and protect your collection.

With the Inventory Manager Upgrade, maintaining up-to-date records and achieving collections accountability has never been easier!
