

Networking for PastPerfect 5.0

The Network Upgrade speeds data entry by enabling multiple users to work with the same dataset at the same time.

The Network Upgrade gives your organization additional licenses to install PastPerfect on multiple computers. By sharing data files, workers simultaneously access the most current data and images. For organizations interested in rapid data entry by a number of people, or sharing data across departments, this upgrade is a simple and effective solution.

PastPerfect is compatible with both peer-to-peer and client/server networks, for both small and large organizations. We recommend running PastPerfect on a wired network, with a 100 Mbps throughput speed for the best performance. We offer several licensing levels for the Network Upgrade to give you the number of PastPerfect installations you need.

	Standard Price	AASLH Price
Network Upgrade 2-5 Users	\$ 515.00	\$ 412.00
Network Upgrade 6-10 Users	\$ 900.00	\$ 720.00
Network Upgrade 11-25 Users	\$ 1,240.00	\$ 992.00
Network Upgrade Unlimited Users	\$ 1,650.00	\$ 1,320.00
