

PastPerfect 5.0 Upgrade

Get hundreds of new features for as little as \$300 with your institution's AASLH discount!

The new PastPerfect 5.0 is jam-packed with new features that give you the power to manage your collections and contacts more effectively. The PastPerfect screens have been redesigned to have a more ergonomic and intuitive interface. The new Version 5.0 enables you to do all of the functions from Version 4.0, plus you can now:

- Enter over **3 million catalog records**, with almost 1 million records in each catalog.
- Assign object names using the integrated **Nomenclature 3.0** for Museum Cataloging, or choose to continue with your current lexicon.
- Build and organize **Catalog Lists** to streamline creating exhibits, facilitate mass updates, simplify outgoing loans, and make managing collections more efficient.
- Write professional mail merge letters with the new **MS Word interface**.
- Get more out of **Contact Lists** by creating an unlimited number of custom lists with the new, easier-to-use list builder.
- **Customize research** query fields and search results display columns.
- Save, modify, and name **multiple report layouts**.
- Define **fiscal year** for Donations, Dues and Reporting.
- Track **activities** associated with accessions and incoming loans.

Upgrading to Version 5.0 is economical and straightforward.

In most cases, the upgrade will run on your existing PastPerfect computers. All of your PastPerfect 4.0 data, images and multimedia files will import with just one mouse click. Previously installed add-on products, such as MultiMedia, Networking, Barcode Printing, and PastPerfect-Online, will automatically transfer to your new program. There are no hidden costs!

Please note: Version 5.0 does not support Scatter/Gather or ezMARC. MS Word must be installed on each PastPerfect workstation for full functionality.

Explore Version 5.0 by downloading the free trial version at www.MuseumSoftware.com!
