

Virtual Exhibit for PASTPERFECT

Virtual Exhibit is the instant web site creator for PastPerfect Museum Software

Point and click on the PastPerfect records you want to share, and Virtual Exhibit (VE) will create an entire web site for your museum. No web programming knowledge is required. VE converts collection records and images stored in PastPerfect to searchable HTML web pages for posting on the World Wide Web. Visitors may browse and view digitized images of photographs and artifacts for a rich online experience.

Virtual Exhibit automates the work and allows you to personalize the homepage, screen color, font size, and image size for your web site. You select which records, fields, and images display from the four PastPerfect collections catalogs. VE allows you to create a site that includes photographs, archives, objects, and books for a complete online learning

Virtual Exhibit is a great way to promote your museum's exhibits and events

VE is so easy to use, you can change your web site anytime. Create online exhibits to complement and help advertise your changing exhibits in the brick and mortar museum.

You can use VE to create an entire web site or integrate VE pages into an existing site to display your artifacts and images. You choose which fields and which records to post on the web, eliminating the risk of unauthorized access.

Virtual Exhibit has built in FTP and CD creation software allowing you to share your data with the world.

Hardware Requirements

Virtual Exhibit runs on Windows 2000, XP, Vista.

Virtual Exhibit requires PastPerfect Museum Software Version 4.0 with the Multi-Media module. Get started today for only \$420 or \$336 for AASLH Institutional members!

Virtual Exhibit is an easy-to-use and powerful website designer.
