

**I updated some information in PastPerfect and created new HTML afterwards in Virtual Exhibit, but the changes aren't showing up. Why is that?**

Version 4.0

You will need to update the records in Virtual Exhibit before you create the new HTML. This allows the changes to be pulled over from PastPerfect into Virtual Exhibit. You can do this without affecting your Virtual Exhibit layout design.

In Virtual Exhibit, click on the exhibit that is affected in the website (i. e. Exhibit 1). To update the specific records for which you have made changes in PastPerfect and leave other records untouched in that exhibit, click the Web Page Editor button at the top of this screen. Find a record you want to update and click Update. Repeat this process for each record you want to update. If you want to update all the records in this exhibit, click on the Update button instead of Web Page Editor. This will update all the records in this exhibit with changes you have made in PastPerfect.

To finalize these changes, please use the Create HTML for Website function and then upload your updated site to your website.

If you have any questions, please contact our Support Office at (800)562-6080. Thank you for using PastPerfect!
